# Robot User Manual

How to run it?

```
D:\>cd 140921609

D:\140921609>cd Code

D:\140921609\Code>javac RobotGUI.java

D:\140921609\Code>javac RobotInterface.java

D:\140921609\Code>java RobotGUI

D:\140921609\Code>
```

※Open command window and enter the path you stored the file. And then enter "javac RobotInterface.java" and "javac RobotGUI.java" to compile them. Then enter "java RobotGUI" to run it.
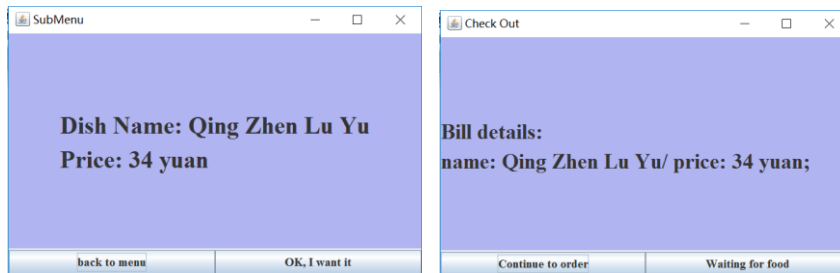

How to use it?

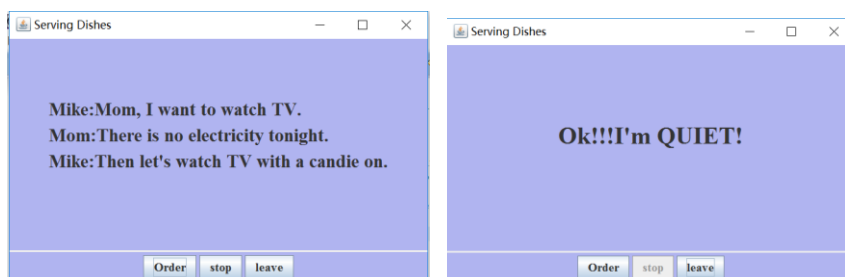

※Press the "Order!" button. Click one you want to order.

※You have entered the sub menu. Click one you want to order or back to menu. Attention: if
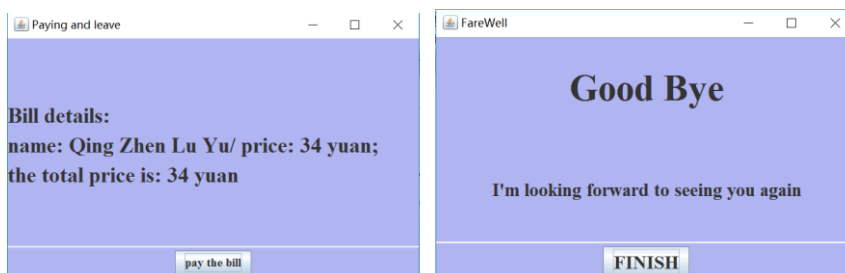

the stock left of a dish is 0, the button will be enable and you cannot click it anymore.

※the first time you confirm the dish you ordered. Choose "ok, I want it". Or you give up the

dishes. When you choose "waiting for food" robot will serve the dishes and tell jokes.

※You can click order to continue to order or ask the robot to be quiet.

※When you ask to leave, the robot will show you bill details and pay the bill, a random

selected farewell message will show on the screen. Click FINISH it will go another Welcome

interface.

※When the robot is inactive for 30 seconds, it enters a sleeping mode. Unless you enter the

"确定" button, it will wake up and you can continue your operation.
